

Technical Data Sheet
PVC PROTECTION GRID - 100 mm*

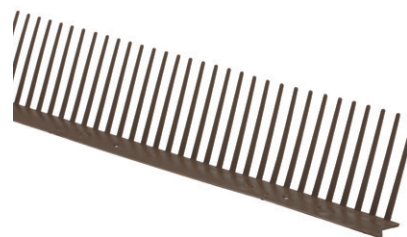

EN

Code	Review	Page
TS.EN.COMP.01	1	Page. 1 de 1

DESCRIPTION

The PVC protection grid is applied in eaves and valleys in all areas where there are air inlets between the tiles, susceptible to birds, leaves entering etc. Designed and produced with flexible ends to hold up under stress and act as a barrier to animals and objects.

Material:	PVC
Color:	Red
Geometric Features:	
Length:	1000 mm
Width:	100 mm
Yield:	1 unit/m

APPLICATION

Application scheme: applied with glue/sealant and/or screws, to the basis, which should be sized and have the characteristics of the fixation support. It should be applied before the clay pieces, a level further back so that it is properly hidden. For a better aesthetic result, the UM Canudo closures can be used inverted to cover the spaces between tiles with the desired finish.

* Premium solution recommended by UMBELINO MONTEIRO.
