## DESCRIPTION

The eave fixation clamp works with this crew to ensure proper fixing of the eave tiles. Either if the eave is made by the tile itself or by special pieces (under eave tile and cover eave tile), the clamp allows the pieces to be held effectively, guaranteeing freedom of movements in any direction. Effective to ensure that the clay eave pieces are not "pulled off" over time and by the wind. Made of lacquered zinc, it folds easily according to the height of the ceramic tile.

Material:	Zinc
Color:	Red ou Zinc
<b>Geometric Features:</b>	
Length:	100 mm
Width:	15 mm
Weight:	0,010 gr
Yield:	5 units/m

## APPLICATION

Application scheme: the fixation piece is applied on one side and approximately midway under the gutter/eave tile, depending on how far the piece comes out. It is usually fastened at the same point as the PVC protection grid and with a suitable screw.

Note: Due to its versatile design, this fixation piece is still used in situations with the need for complementary fixation.
