

Technical Data Sheet METALLIC DRAINING VALLEY

EN

Code	Review	Page
TS.EN.COMP.12	1	Page. 1 de 1

DESCRIPTION

Metallic draining valley in aluminium for waterproofing roofs. This piece has longitudinal channels that allows being moulded, as well as draining water. It is resistant to ageing caused by atmospheric conditions such as humidity, ice and UV rays.

Material:	Aluminum
Color:	Red
Geometric Features:	
Length:	2000 mm
Width:	500 mm
Espessura:	0,58 mm
Weight:	1700 gr
Yield:	1 unit per 2 m

APPLICATION

The gutter should be moulded from its axis applied in the lower zone of the drainage channel. You should then climb up over the support batten of the valley tiles. Finally it is fixed using screws or sealant directly on the batten to support the valley tiles.
